CMiC Integration

HAMMERTECH

HammerTech—the Compliance, Risk and Safety Control Tower for construction Owners, EPCM's and general contractors to improve productivity and profit.

Enhance CMiC with HammerTech to connect project, safety and finance teams improving procurement, productivity and profitably. Eliminate spreadsheets with real-time labor hours and automatic crew time calculation direct from trade partners to reduce incidents and avoid delays. Eliminate double entry with project and vendor sync for increased compliance and faster on-boarding.

4X On-boarding

16% Improved Productivity

Benefits

Fast-Track Labor Hour Collection
Trades submit number of workers and hours per worker daily in HammerTech. Hours sync with automatic crew time calculation in CMiC's Daily journal-without adding systems or head count. Avoid paper and spreadsheets improving productivity by up to 16% for superintendents and project teams.

Reduce Incidents and Delays
Increase safety metric accuracy and progress insight with live crew time as well as accuracy of cost and schedule forecasts. Identify production issues before they cause schedule pressure which can lead to incidents to reduce delays and increase job profitability.

Improve Trade Partner Quality
Increase accuracy of vendor financial, compliance, risk and safety performance data with vendor to project sync. Multiple identification points including business tax numbers or EIN link project activity to the correct vendors to improve procurement and selection processes.

Improve Governance with Project Sync
Improve project information accuracy across all platforms and reduce duplication to save time. Ensure projects are only created once they've cleared your governance requirements. Any subsequent updates in CMiC automatically sync to HammerTech.

Fast-Track On-boarding
Reduce start-up friction and speed-up on-boarding by 4X. With one-click import, you can add business partners who are on-boarded in CMiC to new HammerTech projects and begin enrolling workers right away.
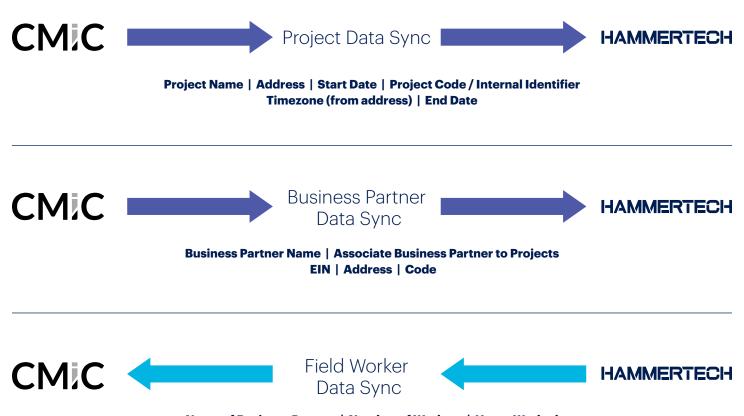

DPR CONSTRUCTION

Plug and play integration now available. Developed with DPR Construction.

CMiC Integration

HAMMERTECH

CMiC → Project Data Sync → **HAMMERTECH**

**Project Name | Address | Start Date | Project Code / Internal Identifier
Timezone (from address) | End Date**

CMiC → Business Partner Data Sync → **HAMMERTECH**

**Business Partner Name | Associate Business Partner to Projects
EIN | Address | Code**

CMiC ← Field Worker Data Sync ← **HAMMERTECH**

**Name of Business Partner | Number of Workers | Hours Worked
Total Hours | Notation if hours synced with HammerTech**

Compare system usage – total number of projects in HammerTech vs. CMiC

Automatic crew time calculation of total hours and worker numbers with data collected directly from trade partners in HammerTech in CMiC Daily journal. With option for site supervisors to review and approve prior to sync.

About HammerTech

Over 1 million+ workers are enrolled in the HammerTech platform by leading owners, engineers, and contractors. Each day over 100,000 workers sign-in worldwide, supporting a combined $100 Billion in annual construction volume.
